

Discovery Demand

I will need the following materials (if used in this case) for a case review:

- 1 All laboratory report(s)
- 2 Memos and communications related to this case
- 3 Any hospital or medical reports relevant to the case
- 4 Chain-of-custody documentation for all forensic samples
- 5 For ABI 310, 3100 or 3130 (or other genetic analyzer) data
- 6 Printed copies of electropherograms
- 7 GeneMapper files
- 8 Various worksheets related to extraction, quantitation, amplification and statistics
- 9 All electronic files should be recorded onto write-only CD media
- 10 All serological reports and notes
- 11 The laboratory protocols and procedures used (lab manual)
- 12 Laboratory notes
- 13 The gene frequency databases for all loci
- 14 Any error or deviation reports/memos from established procedures
